GAME SCHEDULED WITH MANCELONA.

Grayling High school has a football team this year for the first time since the year 1917. Altho this is the first time these players have ever had a football in their hands, Coach Clifford Crane says they are doing well. They have been working out everyday

According to Larry F, Livingston land clearing specialist of the Michigan Agriculture College, Sodatol, the new war salvage explosive, is one of the safest known explosives on the

"By safe," declared Mr. Livingston. 'I mean that it is comparatively safe that is, in the sense that we consider any explosive 'safe' which is in use

He claims that Sodatol is more eas-He claims that Sociato is more easily exploded than picric acid which was used extensively by the farmers during the past two years. This is proved when it is known that Sociatol only requires a number six cap to detonate it, whereas pieric acid took a number eight can. This latter fact was detrimental to its general use. There is no danger, whatever, in handling Sodatol providing that ordinary care used in handling any experience of the source of the losive is exercised.

One of the chief requisites in the handling of Sodatol is that it be kept

handling of Sodatol is that it be kept in a cool place. Any explosive when heated becomes a treacherous thing to handle. It should not be exposed to fire or flame of any kind.

Sodatol, as with picric acid, will not cause a headache to the user if handled in an out-of-doors operation. Lots of fresh air will dispel quickly any odors or gases from the explosion. Sodatol does not differ from any comporcial explosive in this respect.

m a cool place. Any explosive when heated becomes a treacherous thing to handle. It should not be exposed to fire or flame of any kind.

Sodatol, as with picric acid, will not cause a headache to the user if handled in an out-of-doors operation. Lots of fresh air will dispel quickly any odors or gases from the explosion. Sodatol does not differ from any commercial explosive in this respect. However picric acid stained the hands yellow, and Sodatol, it is claimed, not only will not stain the hands but it will cause no other bad effects.

Debating.

We are ready for another crack at debating honors, although last year was sufficient to introduce debates in G. H. S. What we want this year is two teams so as to have some opposition. That being the case we can have a preliminary debate before the Assembly, thus becoming more familiar with the subject. The question for debate is, Resolved "That the Ship Subsidy Bill Should Be a National Policy."

All work and no play makes Jack

All work and no play makes Jack a dull boy, so says Mr. Smith, but he advocates organized play. Everyone is urged to enter some form of ganized play. It develops leadership. Marie Phalen visited Clarence Ing-

GEORGE WASHINGTON MASONIC NATIONAL MEMORIAL.

The cornerstone of this impressive structure, 230 by 160 feet and 200 feet high, is to be laid Nov. 1, at Alexandria, Va. Masons are raising \$4,000,000 for the memorial and an endowment. The site chosen for the monument is Shooters Hill, along the Potomae, which overlooks Washington, D. C., and Mount Vernon. The whole is inspired by the great towers built by the Greeks and Romans in ancient times, to mark the entrances to their harbors and on whose summits burning flares, which could be seen far at sea, guided the mariner. The architects are Helmle & Corbett of New York; the consulting architects are Osgood & Osgood of Grand Rapids, Mich; the lanscape architects are Olmstead Brothers & Parker, Brookline, Mass.

NEW LAUNDRY

HEAVY DEMANDS FORCE COM-PANY TO ENLARGE PLANT.

Business is getting better and better every day at the Grayling laundry; and this is not applying any of Dr. Coue's treatment either. The high class work that is being turned out at that place is bringing back well pleased customers and many new

nai building would be amply large to accommodate all the requirements. They had hardly gotten started before an addition had to be constructed on the front end, for an office and hand ironing rooms. Now a new engine room and added space to the wash room is being built at the rear end of the main building. This addition will be when completed about 24x30 feet in size and will be made of cement blocks.

Everyone at the Laundry is hustling every minute and many articles of tourists, who come north each year

Everyone at the Laundry is fustlessing every minute and many articles are being turned out daily. The most modern methods are being used and the most careful pains taken to see that all garments are returned to the owners in a clean well finished condi-

The AVALANCHE has mentione The AVALANCHE has mentioned many times the need of a laundry in Grayling, and the large patronage that is being given this new institution is ample proof that that was true. Manager Peterson says that he intends to keep the capacity of the plant ahead of the demands. If the people need the service the plant will be kept up to a standard that will be kept up to a standard that will supply it.

Because of the temporary tie-up the AVALANCHE office last we

There are 121 people, large and small, enrolled in the Frederic schools this year. There are 26 in the high room, 29 in the grammar department, 27 in the interregalists and 29 in the 37 in the intermediate and 39 in th primary department. The primary and intermediate rooms are filled to their capacity. There are still four vacant seats in the high room but these will probably be filled in the near future.

The courses of study are made out to meet the requirements of the Uni-versity of Michigan and they are look versity of Michigan and they are looking forward to a prosperous year. They give special attention to the preparation of young people for the profession of teaching and cordially invite any of our young men and young women who care to to avail themselves of this opportunity.

The annual summary of game law The annual summary of game laws for the season 1923-4, compiled by George A. Lawyer, Chief United States Game Warden, designated as Farmers' Bulletin No. 1275 has just been made available for distribution and will be supplied upon request by Congressman Roy O. Woodruff of this District.

This publication contains a review of legislation of 1923, a summary of laws relating to seasons, licenses, limlaws for each of the forty-eight states. There are other chapters cov-ering the Lacev Act states. There are other enapters covering the Lacey Act, regulating interstate commerce in game, the Tariff Act, regulating importation of plumage, game, etc. the Migratory Bird Act and other information invaluable to the hunter wherever the sport is energed in

sport is engaged in.

WOODS ABLAZE

It seems that with the attractiveness of Northern Michigan summers nothing more could be asked for. However it remains for Dame Nature to venture forth each fall with her mystic brush and paint the trees and brush in the most brilliant of colors.

To say that the scenery in the woods of Crawford county is gorgeous ones each week.

It was first believed that the original building would be amply large to accommodate all the requirements. They had hardly gotten started before an addition had to be constructed for an addition had to be constructed to the fore an addition had to be constructed to the fore an addition had to be constructed to the fore an addition had to be constructed to the fore and the fore to the fore to the fore to the fore the fore and the fore the fore the fore the fore and the fore the fo

Because of the temporary tie-up in the AVALANCHE office last week because of Linotype trouble, many articles had to be omitted. Among them was an account of the visit of members of the Board of Trade to the State Forestry at Higgins Lake.

There were 29 in the party. They eft Grayling at 11:30 a. m. Thursday Sept. 23 and went first to the home of the custodian of the forestry, Mr. Wm. H. Aubray, where they enjoyed an appetizing dinner.

After dinner they were shown th attractions of the forestry by State ester Marcus Schaaf, who explained how the pine seeds were first expracted from the pine cones by being taked in ovens which caused the cones

o open and the seeds to drop out.

These seeds are planted in nursery
sets where they remain until large nough to transplant. Each year here are successions of plantings un-il now there are about 4,000 acres planted and growing. The Higgins Lake forestry contains about 20,000 acres and it is expected that eventually the entire tract will be required to supply the demand of pine trees for eforesting the cutover lands of Michgan. Native pines are mostly used, such as white and Norway pines.

PASTORI-BAILEY.

A pretty wedding was solemnized ast Sunday afternoon, at Groveland arm, the home of Mr. and Mrs. R. D. aim; the home of Mr. and Mrs. R. D. Jailey at Gaylord when their daughter Miss Leila May was given in marriage to Mr. Joseph Pastori of Detroit. The young couple were attended by Mr. and Mrs. Rupert Porter, he latter being a sister of the bride. Iwo little tots, Barbara and Joan Baidey, nieces of the bride acted as flower girl and ring bearer.

The bride was prettily gowned in blue canton crepe and carried a bouquet of white bridal roses. Elder Alien Schreur officiated at the ceremony. The home was attractively decorated in a color scheme of yellow and white

n a color scheme of yellow and white

in a color screene of yearow and water ind autumn leaves of pretty hues. Following the ceremony a bounteous wedding dinner was served the guests who included relatives and a few close iends of the family.

Mr. and Mrs. Pastori after spending

few days in Grayling will leave for etroit where they will make their

M. A. C. TO OPEN FOR SIXTY SIXTH YEAR.

Early Enrollment Figures Indicate Big Attendance At State College. East Lansing, Sept.—The Michigan Agricultural College will open its doors to the young men and women of the state on Wednesday, Sept. 26, for the sixty-sixth consecutive year since the state college was founded in 1857. Registration for freshmen will be held on Sept. 24 and for upper classmen on Sept. 25.

classmen on Sent. 25. classmen on Sept. 25.

Advance registration figures available at the office of the college registrar this week indicate that the attendance this year will equal or exceed the best previous mark in the history of the school. More than 1700 regular four-year students, were enrolled during the past year, and an even larger attendance is looked for this fall.

The agricultural course, the oldest at M. A. C., and the one from which the college takes its name, is expected as usual to draw a large proportion of the students, as is the engineering division. These two courses accounted for more than 1,000 of last year's engineering the college of the students. rollment. Home economics, forestry, veterinary medicine and applied science courses have also had many ad-

vance registrations.

The applied science division, first established two years ago, is expected to show the largest percentage increase, while reports show that more girls than ever will elect work under the home according branch of the in the home economics branch of the in

A number of minor changes in the faculty have been announced for the year, while Miss Jean Krueger new dean of home economics and Harrison R. Hunt newly appointed professor of zoology, will take office with the open-ing of the college year.

Ghe AMERICAN

HEADS LEGION AD. MEN'S POST

Maj. Reed Landis, One of the Air plane Aces, Chairman of Committee on Aeronautics.

Maj. Reed G. Landis, chairman of the American Legion's national comfied to speak and act on this subject ccording to his war record. Majo Landis has nearly a dozen enemy air planes to his credit, and was in some stirring engagements.

Of course great deeds are to be expected of the son of such a virile American figure as Judge Kenesav Mountain Landis, but the young mar has won a record "of his own."

Major Landis was a member of the old First Illinois cavalry when the troops massed on the Southern border in 1916. Though discharged from service there, he was recalled in 1917 and was sent to the first officers training camp, only to be transferred to the air service, becoming a student of the ground school. He took flying instructions at the University of Illinois flying field, was sent to England and assigned to the Fortleth squadron, British expeditionary forces, then flying the "single seaters." He accounted officially for ten Hun planes before he was relieved

Maj. Reed G. Landis.

from the British service to take command of the Twenty-fifth squadron of the American forces. After commanding this organization for a short time, he was ordered home and was attached to General Woods' headquarters staff at Chicago as departmental

air service officer. For his ability with aircraft, Major Landis was awarded the highly cov-eted British Flying Cross, a decoration much sought by all English avia-tors. As a writer, he has contributed to a number of periodicals, with spe-cial articles on the air service.

Major Landis has been commander of the Advertising Men's post of the American Legion in Chicago, and has een catled on to speak before many Legionnaires throughout the country in addition to his duties as chairman of the national aeronautics com-

MAY RECPEN BONUS CASE

Result of Minnesota Supreme Court Decision Likely to Affect "Non-Residence" Ruling

Claims of from 10,000 to 15,000 vetrans who registered and were inducted into the service from Minnesota disallowed by the bonus board on "nonresidence" ruling, may be re opened as a result of the recent de-cision of the state Supreme court in

the case of Everett Baum. In its ruling the Supreme court held that a person temporarily residing in Minnesota at the time of the call for registration who registered and who thereafter left the state but returned to be inducted by the draft board into the service, is entitled to the state

Baum, who was born in Pennsylvania, came to Minneapolis in May, 1917, obtained work and registered for the draft in June. The following Janu ary he went to Oregon and Washing ton, but returned in July at the call of the draft board. He entered the serv ice and a year later was honorably discharged.

The bonus board disallowed his claim on the grounds that he was not bona fide resident of Minnesota. The Supreme court ruled that he was a resident because "the place of residence is the place of work."

It is pointed out by American Legion members that if this is the case, the 10,000 or 15,000 similar applications involving nearly \$8,000,000 from others, who constituted the state's floating population on registration day June 5, 1917, and who were subse quently inducted, may also be affected

Post Meeting Held in Bus. Hopping into a "rubber-neck" wagor when their meeting place was unavailable, members of the Sergeant Jasper post of the American Legion in Wash ington, used a most unique method in the transaction of business of the or ganization. As the big bus sped by ringing "ayes" and "noes" were heard, causing much wonderment. Heavy traffic of the streets caused a mix-up in two or three votes, but the meeting was successful, according to the members who attended. This meeting place should be popular.

Even With Dairy Cows The best results from dairying fol-low the combination of good cows and the right feeds. Without a correctly balanced ration even a good cow cannot yield profitable returns. Because of this fact the dairy specialists at the Missouri College of Agriculture are able to put dollars into the pockets of the dairymen who will apply their recommendations

"Profitable production in dairying must begin with the feed," says E. M. Harmon, extension dairy specialist. "Without the right feeds no animal can make milk and butterfat efficient ly, no matter what her breeding. It essential to have balance in the ra The cow's body and her product -milk-are both made up primarily of four kinds of constituents; Water, protein, carbohydrates (and fats), and nineral matter.

"The water supply is of utmost importance. As a general rule the mineral requirements will be satisfied if plenty of legume hays are fed. This leaves the protein and carbohydrate requirements to be satisfied. Either of these cannot replace the other any more than the air in an automobil can replace the gasoline in the tank.

"Some feeds are high in protein while others are high in carbohy drates. If we feed more of one that necessary to balance with the other the excess will simply go to waste. For instance an average farm ration of 25 pounds of corn silage, 8 pounds timothy hay, 4 pounds of corn chop and 1 pound of wheat bran supplies enough carbohydrates to maintain the body requirements of a 1,000-pound cow, and produce 20 pounds of milk. It supplies only enough protein how ever, to produce 4 pounds of milk after maintaining the body. "By substituting a legume hay for

the timothy; adding a pound of cot-tonseed meal and a pound of bran and reducing the corn chop to 3 pounds we get a ration that will supply just the right amounts of both protein and carbohydrates to maintain the cow's body and produce 20 pounds of milk.

Dairy Farmers See Need

of Well Built Ice House The dairy farmers who smile during the hot days are those who had the foresight to lay in a supply of ice last

Many other dairymen now see the advantage of having a large, chear supply of ice to keep their milk cooled and are therefore thinking of erecting their own icehouses. A good house can be built on the following plan, says E. R. Gross, professor of rural engineering at the New Jersey State College of Agriculture: The floor should be pebbles or gravel

to afford drainage. The foundation of masonry or concrete should extend well into the ground and the capacity of the house will be increased if the floor is placed at the bottom of the foundation. Make the foundation 9 to 12 inches thick. Use 2 by 8-inch studding, with sheathing, building paper and weather boarding outside Sheathing alone on the inside will make a good house, but it is still better if the inside wall is constructed of two layers of boarding—sheathing against the studding, and the sheathing covered with tongued-and-grooved boarding, with a layer of paper in be tween. An ordinary shingle roof left open at the eaves and with a ventila-

tor at the ridge completes the building. One and one-half to two tons of ice is needed for each cow. One ton occu ples 50 cubic feet.

The packing of the ice is probably the most important of the things to be observed in ice storage. The ice must be cut evenly so it will pack closely, and crevices should be filled with chipped ice. The ice block, if properly packed, is practically one solid mass of ice. On top, bottom and all sides of the ice, pack not less than 12 inches of sawdust, chopped straw or other in sulating material.

Income From Hogs.

Saving the summer and early fall farrowed pigs, with a view to adding 100 pounds to their January weight and selling during late March at a weight of 200 pounds or better assures an income at a time when farm receipts are light and the price for hogs usually good.

Three Hog Essentials.

Good judgment, a fertile soil and labor are three essentials to success in raising hogs. Omit any one of these and the venture will stand up like three-legged stool with a leg missing.

Cull out those that show signs of allment and disease. Get rid of them

Cost to Feed Mongrels, It does not cost any more to feed oure breds than it does the mongre or mixed type. In the case of mongrels there is no uniformity in size, shape or color of the eggs and they will never bring a premium for hatching purposes, as do the eggs of pure breds.

Mash for Young Ducks. Young ducks should be fed a masl without the grain ration until they are well matured. An important part of the ration is a good grit.

Not Cleanest Man.

If you go into a man's cow stable and find everything in a filthy condi-tion you are safe to make the guess that the fellow himself is not the

If You Need a Medicine You Should Have the Bes

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain-the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited to those who are in need of it. A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney. liver and bladder ailments, corrects uniterated by the price and complete and materializes the price and

liver and bladder ailments, corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by parcel post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Advertisement.

The Worm Turns. "Is this hot enough for you?" "Cut it out! I'm fed up on those uestionnaires."

Careless Cat. Mr. B. writes: "Three-year-old Al-lan had been put to bed for his regular afternoon nap. While lying there trying to hold off the sandman his pet cat lumped upon the bed and remained there purring loudly. After gazing at it a few minutes Allan exclaimed, "Hey, you! Why don't you shut off your motor when you're standing still."—Boston Transcript.

Through a Sieve Woven **Finer Than** Silk

Raw materials of which portland cement is made come out of the ground usually as solid rock.

They must first be crushed, ground and reground until at least 85 per cent of the resulting powder will shake through a sieve that will actually hold water.

This sieve is considerably finer than the finest silk fabric. It has 200 hair-like bronze wires to the inch. That means 40,000 holes to the square inch.

But the several crushings and grindings necessary to reduce solid rock to this extreme fineness are only the beginning of cement making.

The powdered materials must then be subjected to intense heat for several hours in huge rotary kilns. Here they are half melted and become a substance much harder than the original rock—clinker, it is called.

Then the clinker must be crushed and ground until at least 78 per cent of the resulting product will pass through the sieve woven finer than silk. This is portland coment.

More than 80 power and fuel consuming operations are necessary in cement making. The electric power alone used in producing a barrel of portland cement would, if purchased at usual household rates, cost \$1.70.

Few manufactured products go through so involved or complicated a process as portland cement. And it sells for less per pound than any comparable manufactured product.

Saved from an Operation by Lydia E. Pinkham's Vegetable

Sidell, Ill.-"I was a nervous wreck.

SYNOPSIS.—On the isolated Meager ranch, on the southern border, Deborah Meredith, trained nurse, is in attendance on Mrs.

Meager ranch, on the southern border, Deborah Meredith, trained nurse. Is in attendance on Mrs. Meager, whose hisband has recently been killed. Immediately after the death, Bob Meager, Mrs. Meager's stopson, arrives and takes possession. He insults Deborah and she resolves to leave, but there seems no possibility of her getting away. Meager gloats over Deborah's plight, He tells her he has sent for a fustice of the peace, who will marry them tomorrow. Horrifed, the girl secures a revolver. The justice, Cornelius Garrity, among them the "Frisco Kid." hotorious desperado. Despite Deborah's protests, the justice beforah's protests, the justice performs the marriage ceremony. She escapes and reaches her coom. There she stuns Meager with the revolver and rushes to the stables, hoping to secure a horse and escape. There, she meets the "Prisco Kid." Somehow he inspires her with confidence and she explains the situation. The "Kid" tells her his name is Daniel Kelleen, that his no friend of Meager. They ride off together into the desert. Presently she realizes that Kelleen is the "Frisco Kid." but doesn't fear him. Deborah hears the story of the "Frisco Kid."

CHAPTER IX-Continued.

Her eyes traced the rugged bluff

hopelessly; to attempt scaling that would only bring her into full view,

But now this doubt remains a pleasant remembers to the control of their night's ride together recurred in his presence. In spite of her night's ride together recurred in his presence usual, Deborah was quick to note and turned with redoubled vigor, and, for appreciate. "Only the two of us. Yet the moment, she actually feared him it might be, for we knew not even as much as the man she had tried to jungle; rather he had shown himself kill. More, perhaps, for Meager was "That was an after-thought, and only a rough, passionate brute, while him a far more dangerous adversary, If he also was interested in her-and Kelleen swung one leg carelessly the girl felt that he was she was in greater danger now than on the ranch from which she had fied. She shrank from the thought, yet it haunted her. and would not be driven away. Where certain the keen, searching eyes had could she go? What could she do to escape the man's return? Suicidal, the steep front of the overtowering impossible as it appeared, she must cliff. He suspected where she was find some means of leaving that fatal valley before he came back again alone seeking her.

The girl drew back slowly, with eyes searching the open valley, intent first of all on reaching the horse grazing below. The only possible way was the one she had taken in climbing there, along a ledge of stone close in against the rock wall. The whole face of the cliff was a mass of trailing vines, clinging in some mysterious way to imperceptible crevices in the rock completely veiling its front far up above her reach. Deborah pressed these back to gain passage, and had idvanced a dozen steps or more, when she stopped, paralyzed with fear, staring into two terrifying eyes. could not move a limb, or scream in that first instant of horror. Then a hand reached out, swept the conceal ing vines aside, and gripped her.

CHAPTER X Within the Tunnel. Deborah struggled to break away, emitting one startled cry for help, be-fore the fingers of her assailant closed viselike on her throat. She was in the grasp of a glant, merciless in the exercise of his power, and felt herself dragged helplessly through the tangle of vines into blackness beyond. It was a man; she knew that, although she had no glimpse of the face, and made desperate effort at release, given unusual strength by terror; but the grip and her power of resistance waned. until she suddenly lost consciousness and all sense of her surroundings. Her body lay limp in the fellow's arms, and, with a growl of satisfaction, he bore the motionless, seemingly lifeless body judge came also from Nogales. He back through the deepening shadows, and cast it down on the stone floor. The man stood above the huddled figure of the girl, hardly defined, shape-less in the gloom, and laughed silently. He bent down and touched her "Out of Calabasis, senor, by way of only to straighten up once more, convinced she was not dead. A rifle

TO HAUL AWAY MOUNTAIN PATIENTS AIDED BY RADIO

Workmen Near Bisbee, Ariz., Are Trying a New Venture in Copper Mining.

For some time past, it seems, work men near Bisbee, in Arizona, have been trying a new venture in copper mining. Instead of following the pre-scribed method of hollowing out a mountain and using shafts and tunnels, they dig it down with seam shovels and cart it away. One can form some idea of the magniture of the task when he learns that it will take more than sixteen years to complete it, that during the process approximately 25,000,000 tons of copper ore will be carted away, and that from it something like a billion pounds of copper will be extracted.

During the five years the work has been carried on five million cubic vards or more of material have been taken from the mountain, though that amount does not represent pure ore. As fast as the material is dug it is hauled over a fifteen-mile railway to red over a fifteen-mile railway to and cynical. Buy Your Tires

from a DEALER

At the Latest Prices—The Lowest in History

You will find the Firestone Dealer one of the stable business men of your com-munity. He offers a clean, fresh stock, backed by a well organized service. He. wants you as a permanent customer.

That is the reason he sells Firestone tires. He knows and has plenty of proof that they are the best tires on the market. He can give you the greatest value and thereby retain your trade for years.

Every day you find new proof of this unequalled value. On the 15th of this month, Firestone Tires set two new dirt track records at Syracuse when Tommy Milton slid around four turns at every mile and covered the 100 miles in 75 min utes, 33 hundredths seconds. He also established a new world's record for one mile by covering it in 42 and 28 hundredths seconds. The next four cars to finish were also equipped with Firestone Gum-Dipped Cords. Each one of them

went the entire race without a stop. This and every other important race this year was won on Firestone Gum-Dipped Cords and Steam-Welded Tubes. Such performance gives you conclusive proof of their strength and durability.

Not only do race drivers use Firestone Tires as protection to their lives and the surest way to victory, but the largest tire buyers in the world insist on and buy Firestone Tires for economy and service. These buyers include the leading car manufacturers, the biggest commercial car operators and the taxicab and motorbus operators. 57,639,714 tire miles were sold to taxicab and motorbus operators in the month of August.

Think this over. You cannot afford to accept anything less than Firestone service and economy. You can buy this service and economy from any of the dealers listed below.

The Quality Store

The Maximum of Proved VS Many Extravagant Claims Intrinsic Value of Superiority

Omany announcements of new model carscon-tain extravagant claims for the same superi-orities that it is puzzling to the buyer to know which value is real and which is only a claim. This year the issue has been confused by the introduction of mechanical changes, some of which have been rushed into production while still in the experimental stage—and then imme-diately given wide publicity.

diately given wide publicity.

Important considerations have been overlooked and great stress placed upon unimportant

details.

But the man who intends to buy a motor car need not let this confusion or this glamour of publicity lead him to make a mistake or risk satisfaction in his purchase. The automobiles themselves are available for comparison.

See and be convinced. Riding is believing. As an aid to intelligent buying we offer the following suggestions:

following suggestions:
Place the 1924 model Studebaker Light-Six

Place the 1924 model Studebaker Light-Six
Touring Car at \$995 alongside any car you may
select as belonging in the same class. Every car
looks well in the pictures—most cars make a
good impression in their own show windows.
The Studebaker Light-Six looks a winner alongside the best-looking competitor you can find.
And it's larger, more substantial, roomier, more
comfortable looking—and is more comfortable.
Compare the top. Look inside and out. The
Studebaker top is sturdily built. Has four stout
cross bows. Top material is same as is so satisfactorily used in the Big-Six. Notice the fit,
feel the quality. The rear curtain is one-piece—
has no seams—with a large rectangular window
bound by an enameled moulding.
Compare the body, Studebaker has a roomy,
substantial, carefully made body—all steel even

compare the body. Studebaker has a roomy, substantial, carefully made body—all-steel even to its framework, which permits a finish in baked enamel. A depressed belt line runs around the body and through the hood and radiator, adding to its distinctive appearance. Compare the one-piece, rain-proof windshield, with built-in cowl lamps, with the ordinary two-piece windshield with rubber strip

that leaks in every rain and always obstructs the driver's vision. Notice the large cowl ven-tilator that is quickly operated by merely moving the regulator backward or forward.

Compare the Studebaker door trimmings and fittings with the door fittings of other cars. Notice that the door pocket flaps have weights to hold them in position. Man-sized door handles and latches, positive-action door locks handles and latches, positive-action door locks that catch with a snap and stay closed. Heavy hinges properly located and proportioned. Highest grade trimming material instead of painted cardboard. Fastening nails concealed.

Compare the aluminum-bound linoleum that is neatly fitted and fastened to the floor boards of this \$995 Studebaker Light-Six with the rubber mats that cover the cheap, loosely-fitted floor boards in many other care.

rubber mats that cover the cheap, loosely-fitted floor boards in many other cars.

Compare the cheap robe rail (sometimes hemp rope covered with imitation leather) with the Studebaker nickel plated rail. Compare the forty-cent footrest with the comfortable, carpet-covered footrest, supported by polished aluminum brackets, in the Studebaker.

These comparisons are of features that can be These comparisons are of teatures that can be seen. There are many more down under the surface that could be mentioned, such as the machining of all surfaces of the crankshaft and connecting rods of the Light-Six motor. This is largely responsible for the practical absence of vibration in the Studebaker Light-Six. This is an exclusive Studebaker practice on cars at this price.

If competition is so far inferior in its visible

If competition is so far inferior in its visible parts, it is a certainty that the hidden parts which really determine the satisfaction of a car will be equally inferior.

The Studebaker chassis is as far superior to any other motor car chassis in its price field as Studebaker upholstery is to other upholstery, as the Studebaker body is to any other motor car body in its price field.

Come in and see the Light-Six. Test its performance and comfort yourself. Again—Riding is believing.

Rivera called on the country to form

a "Gran Somaten" or militia pat-terned closely after the Italian Fas-

cistl, to number 450,000. With this or-

ganization, responsible to him alone,

lished interests" of Spain. The In-

ternational Communists who have been

flourishing in Barcelona and other

Spanish cities since the Russian agents

began active work there in 1918, have

realized that the game is up for the present at least, and have been fleeing

from the country. Many of their leaders were caught, and locked up last

week. In pursuance of the plan for

a vigorous campaign against the Moor

ish rebels the Spanish fleet on Wednes-

day began to bombard the hills above

Alhucemas bay with gas shells, to

clear the way for the landing of a

large expeditionary force. General

Alzpuru, the new commander in chief

in Morocco, started to organize an of-

fensive on the western flank. The Spaniards feel it necessary to

demonstrate their ability to govern

the Morocco zone at once, because in

a few days the Tangler conference in

London will open, when Spain will de-

mand permission to rule the Tangler

in that conference and has notified Great Britain, France and Spain that

it will not accept any settlement of

the future control of Tangler which

hinders the establishment there of

American marine coaling and oiling bases. An interesting story from

Mudrid says the old Spanish govern-

ment was conducting negotiations with

England by which Gibraltar was to be

traded by Great Britain for the valu-

able harbors of Tangler. Ceuta and

Mellila and that news of this reached

the military leaders of Spain and has-

To COMPLETE the record of the dictators, it may be said that Pre-

mler Mussolini of Italy is "sitting pretty" in his disputes and negotia-

tions with Greece, Jugo-Slavia and and the League of Nations. The Greek government has paid the "moral rep-arations" for the Janina murders by

applogizing for them, saluting the flags

of Italy, France and England, and at-

tending a solemn requiem mass in the Catholic-cathedral of Athens for

the slain Italian officers. Diplomatic

ing Flume are said to be progressing

amicably, but the government of that

so-called independent state resigned

the other day and Mussolini promptly

appointed General Giardini, third in

military governor. He gave assurance

that this did not affect the status of

Flume, but it served to increase the

fear that he meant to annex that city.

In the sessions of the League of Na

tions there were further barsh criti-

cisms of the league's inaction in the

matter of the occupation of Corfu, es

pecially by Hjalmar Branting. In re-

ply the Italian delegate, Signor, Salan-

dre defended the selzure of the is

land and expressed the hope that the

dispute between Italy and Greece, now

on the way to final settlement, would

not be reopened. He then delivered another severe blow to the authority

of the league, declaring that the cov-

enant was not supreme internationa

law, but only part of fundamental

legislation for regulating international

NEWS REVIEW OF CURRENT EVENTS

Sensational Doings in Governor Walton's War on the Klan in Oklahoma.

STATE UNDER MARTIAL LAW

Legislature Plans to Hold Extra Ses sion-Spain Now Ruled by Dictator and Directorate-Baldwin and Poincare Confer-Berkeley, Cal., is Swept by Flames.

By EDWARD W. PICKARD

O KLAHOMA has become the cen-ter of the war against the Ku Klux Klan. Developments there last week were sensational, and the future is looked to not without some apprehension. Engaged by more of the floggings which are reasonably supposed to be committed or incited by the Klan, Gov. J. C. Walton announced that a state of insurrection and rebellion against the laws and constituted authorities of the state existed, and therefore he proclaimed martial law for the entire state and ordered absolute martial law for Oklahoma City. Oklahoma county and Creek county. Units of the National Guard were called out and a military commission set up and began the examination and trial of civilians—a thing that has not been seen in the United States for

An order was issued prohibiting "all public meetings, publications, literature and verbal expressions tending to create opposition to the enforcement of martial law in Oklahoma county," and consequently the newspapers there have been cautious. However, the publishers of several of the largest dailies in the state have signed and many of the papers have printed an address to the people of the United States de claring that "the supreme issue in Oklahoma today is constitutional government or despotism," and asserting that "Governor Walton, by his acts, has attempted to nullify rights guaranteed under our Constitution, and to halt the lawful processes of republican gov-

In another address the editors urged the members of the legislature to meet immediately, and this is what a large number of the legislators have been Walton says he will not permit it, and is quoted as declaring that if the lawmakers assemble he will build a stockade and put them in Notwithstanding the threat, most a majority of the members of the negotiations with the Serbs concernhouse have signed and issued a call for a special session for the of investigating charges against the governor of "repeated injuries, usurpations and blunders, evidencing the direct object of establishing an absolute tyranny and despotism over the commonwealth.

Walton has strong political support, made up of Farmer-Laborites, radical Democrats and a kind of Nonpartisan eague, but some of these, especially the Laborites, do not take kindly to martial law. The "invisible empire" men are not openly combating the governor's methods, but are working der cover with great energy, and it is believed that in a measure they can control a special session of the legis-Their fiery crosses continued to blaze over certain buildings in Oklahoma City until Thursday, when Walton ordered them struck down. Walton if he reads the news from

Europe, may seek to emulate Benito Mussolini and Gen Prime Rivers but f so he will have to learn that there is a vast difference between the con ditions and peoples in Italy and Spain and those in the United States. dictatorships are necessary or desired in any of our commonwealths.

S O FAR, the coup d'etat of the military aristocracy of Spain is altogether successful. King Alfonso, yielding perforce to the revolutionists, created a national directorate and made Primo Rivera its president with virtually dictatorial powers. The positions of premier and cabinet ministers were suppressed. The new government

Berry on Bean is Really the Seed-

natural growth is checked by the

growers, who keep the trees as low as

PRIME MINISTER BALDWIN spent a couple of days in Paris last week and had a long, chummy talk with Premier Poincare about world af-

singular fact about it being often no-

liceable that the fresh blossom and

the ripened fruit will appear on the

when probably a more formal discussion will be held. The German reichs tag has been called to meet September 26, and it is presumed Chancellor Streseman will announce an in-creased offer to France and also the formal withdrawal of the passive resistance policy in the Ruhr. POOR Japan, struggling toward re covery, was afflicted again. A ty-

tions in particular. It is understood

Poincare expressed a willingness to

meet Baldwin next month in London

phoon struck the eastern coast and a tremendous rainfall brought floods that drowned thousands of the refu-gees of the earthquake. The first foreign check to be received in Japan for the relief of the quake victims was handed to Premier Yamamoto by Ambassador Woods. It was for \$1,000, 000 and came from the American people through the Red Cross. The American army and navy representa-tives there are exceedingly active in the relief work, and at home the Red Cross fund is growing daily, being well on the way to \$10,000,000.

C HEERFUL news comes from Wash-ington in a treasury statement. During the first ten weeks of the new fiscal year, ending September 15, the government reduced its usual expenses \$42,000,000 and increased its income \$29,000,000. The increased revenue included

climbs of \$12,000,000 in customs and \$28,000,000 in income taxes. Miscellaneous internal revenue showed \$239,000,000 or a decline of about \$5,000,000. The total incom tax collection figure was given as \$124,000,000.

Interest on the public debt was only \$38,000,000, a reduction of \$12,000,000. In general expenses for legislative and legislative departments, a decrease of \$20,000,000 is shown, reducing the cost to \$425,000,000.

The shipping board was one of the

few departments showing an increase in expense. It climbed to \$21,466,000, an increase of \$6,000,000. Refunds of customs and internal revenue receipts_totaled \$30,000,000.

but this was \$12,000,000 less than in the same period last year. Railroad claims settlements caused withdraw-als—amounting to \$18,900,000, as against \$21,000,000 last year.

UNITED STATES Prohibition Commissioner Haynes, in a letter to Congressman Hill of Maryland, says it is the intention of the government "to interfere as little as possible" with the right of the farmer to make cider. He continues: "Compared with the abuses arising from the manufacture of distilled spirits and fermented liquors, violations of the national prohibition act arising from the practices of farmers and of manufacturers of cider and fruit juices are practically inconsequential.'

Great Britain has replied to Secre tary Hughes' proposal for a reciproca agreement on ship liquor and liquor smuggling, including extension of the search limit to twelve miles, and the reply is described in Washington as heing "not sympathetic" to the plan. However, the British government will submit the question to the imperial conference which meets next month in London.

WHEN the new dall of the Irish Free State met in Dublin, every one of the 109 members who had taken the oath of allegiance was pres ent, and they unanimously re-elected William Cosgrave president of the state. Forty-four Republican members were absent, eighteen of them being in prison. An appeal by a Farmer member that these rebels be permitted to meet and decide their policy was indignantly rejected by Cosgrave and others, who declared there would be no compromise with

M ORE than fifty blocks of the best residence section of Berkeley Cal., were swept by flames early l week, and between 12,000 and 15,000 persons were made homeless The property loss was probably about \$5,000,000. The city is the site of the University of California, and one of the most attractive in the West. Three other smaller California towns also were burned, all the conflagrations originating in forest fires.

The coffee tree begins to bear when | together. The meat of the fruit is HOW COFFEE TREES GROW it is about three years old and it con-tinues for about twenty years, the

> same tree at the same time. The fruit of the coffee tree is round and red and looks like our cherries and, being sweet to the taste, is eaten by the natives as we eat cherries Each berry contains two seeds, the beans with which we are familiar, in-

valueless, so when the fruit is gathered it is dried so that the seeds may be easily removed.

How coffee first came to be used as a drink is not known, but it has been so used for at least a thousand years in Persia. It was introduced in Europe about three hundred years ago

One thing that America and Europe closed in a skin, with their flat sides one another's duty.—Duluth Herald.

American Dentists Elect Poet.

Cleveland-Dr. C. N. Johnson, of Chicago, widely known throughout the world as a poet, lecturer and dentist, was chosen president-elect of the American Dental association by its house of delegates, here. He will take office next year. Dallas was chosen for the convention city in 1924.

Pony Express Makes Record. San Francisco-A record for cover

ing the 2,180 miles between St. Joseph, Mo., and San Francisco, by horseback, of 158 hours and 8 minutes' riding time, has been made by the revived Pony Express. The United States mail, which was carried out of St. Joseph by horseback on August 31, arrived in San Francisco Sept. 2. The record time of the old Pony Express was beaten by 42 hours. However, during the revival riders were changed every 10 miles, while in the old days every 90 miles.

COOLIDGES FOND OF PLAIN FOOD

"Mac." Their Boston Waiter, Talks About Their Simple Gastronomic Tastes.

Boston, Mass.-Much has been written lately about the simple testes and unassuming ways of Calvin Coolidge. now President of the United States, and of Mrs. Coolidge, and those who are well acquainted with them say this simplicity permeates their life. When Coolidge was governor of Massachusetts he and Mrs. Coolidge made their home at the Adams house, and their regular waiter there, "Mac," who is known to many hundreds of Bos-Sunday Advertiser a lot about their gastronomical tastes. Said he:

"Their breakfast order was always the same—'Two Special No. 1's, grape-fruit for Mrs. Coolinge and orange for me'

"Special No. 1 never varied. consisted of two small pots of coffee, graham muffins and fruit.

"Mr. Coolidge would give the order and call for a clean glass and a whole orange. He would squeeze the orange himself into the glass, and drink the Juice. Silent at Meals.

"Mrs. Coolidge always had half a

"They were generally alone at breakfast, as their boys were at school and only via ted them in vacation time. Once, though, when the boys were there, they wanted ham and eggs for breakfast. Mrs. Coolidge ordered it for them, but when the governor found it out, he frowned on giving the kids

eat for breakfast.
"They were seldom at my table for lunch, as they were both often gone all day. But they would be back for

dinner, unless they were dining out. "Then Mrs. Coolidge used to order a chop—the way you do," interpolated "Mac," who has an uncanny memory for the likes and dislikes of every one of his patrons.

"Sometimes she would have a steak. But Mr. Coolidge always made his dinner on cereal-usually grape nuts and tea or milk. "He was just as quiet at their family

meals as he is in public life. Hardly ever said a word. Breakfast over, he would go away in silence. "They seldom had guests, except Mr. and Mrs. Frank W. Stearns, who were

with them frequently. there would be one or two others with them at dinner. On those occasions Mrs. Coolidge wouldtry every way in the world to get him to join in the conversation. Nothing doing. He would look and listen, but hardly ever opened his mouth-except. for his grape nuts. Once in a while he would shoot a little smile—like this—" and for a fleeting instant "Mac" was

the living image of the President.

Lapsing back to his natural expres sion, which is intense but amiable, 'Mac" continued:

"He is a hard man to get at, if you know what I mean. But when you once do get at him, you find he has one of the best hearts in the world.

All Liked Mrs, Coolidge.
"But for kindness and a charming manner combined, Mrs. Coolidge was the one. Every waiter in the dining room liked to serve her. She was always considerate, always appreciative for anything done for her. If Mrs. Coolidge once knew you, she knew you everywhere, no matter where she happened to meet you. In the hotel corridor, or in the street, she would al-

ways bow. She's a fine woman.
"I used to look at those boys, and their good manners, and wonder how she did it. But then, bringing up six. (Six little McKeoughs, re

ber.) "I said to one of my boys the other day, Look at young Calvin Coolidge. His father's President of the United States, and he's looking for farm work at \$3.50 a day. I suppose if I were president you'd be wanting to take it easy in the White House."

A Healthy Climate.

the healthlest "You must go to the healthlest neighborhood you can ind," said the eminent specialist to Mr. Forsythe. 'And when you get there you must stay there for six months and have a thoroughly good rest." In due course Mr. Forsythe arrived

at the seaside town he had selected and inquired of one of the old inhabitants if it was a really healthy neighborhood. "Well, you see me," said the old

man, who was a fine specimen of health and vigor "when I came here I hadn't the strength to utter a single head and I had to be lifted on and off the bed."

"Ah, you give me hope," said the invalid. "How long have you been "I was born here," was the reply.

Missing Links.

The owner of a coconut plantation has trained a monkey to climb the trees and gather the nuts. But that is too much like his usual occupation to count for much. In China they had done better than that a century ago, for there they had been trained to pull rhubarb and gather rice. In Abyssinia they had simian torch-bearers for supper parties, but the station master at Ultenhage, a small wayside station in Cape Colony, did better and

Bold Economy.

and work the switches.

trained a baboon to act as signalman

Italy is a land of level railway crossings. Very few roads go over or under. Hitherto each crossing had its signalman, who closed the gates ten minutes before the train was due: to the despair of motorists, who often had to wait half an hour for a late Now Mussolini in a fierce attempt at economy has abolished signalmen and gates and left the public to look out for themselves. How will it answer? There are many more oxcarts than autos in Italy.

"Billy Goat Saw Him."

each other, "It's to be a fine reunion." "Yes, squeal, squeal," said Miss Ham. "It is to be a fine reunion. Peo ple mustn't think they're the only ones who can meet about and have family reunions where all the rela tives and grandfathers and grand mothers and grandchildren and unclei and aunts and cousins and daughters in-law come.

"We, of the barnyard, can also have a spiendid reunion!"

"Oh yes, every one must come to the reunion" said Billy Goat. "They must, grunt, grunt," said

Brother Bacon.

"Has every invitation been sent out?" asked Mrs Ham. "Every one," said Mrs. Duck. Just then a caterpillar crawled along through the barnyard, hurrying out of the way for fear he might be enten or trampled upon or killed in one of the ways creatures had of getting rid of caterpillars.

Billy Goat saw him and sang this

ong:
The caterpillar only crawls,
He is not much admired,
But he'll become a butterfly,
For with high ambitions he's fired."
Everyone congratulated Billy Goat
upon his song which was a quite original or the state of the state inal one. The words, everyone said were a little better than the music but it was all good, all good, they said And Billy Goat was delighted with

the praise. In fact so delighted was he that he said he had another he'd sing, though he'd have to think a little about it. While he was thinking, though, he

was talking about it.
"You see," he said, "I heard one of

the young ladies talking the other day, and it seemed she had gone to town dressed in all her old clothes pecause it had been a rainy day when she had started.

"Yes, she had on an old hat, and old shoes and rubbers, and an old skirt and coat. And no sooner had she reached town than the sun came out and there was she on this most beautiful day feeling so like an old

beautiful day feeling so like an old rainy day.

"So this is the song I'm making up about that.

There's nothing sadder in this world. Than to have the sun come out When you're dressed in all your old clothes

Because you were in doubt."

"Of course," said Billy Goat, "she had been in doubt as to whether she'd,

wear her good ones because she had seen a little blue sky in one corner of the sky but she had been afraid that it would rain."

"We see, we see; a fine verse, Billy Goat. We shall have to name you the Poet of the Barnyard. Truly that would be an honor and one that you leserve," the other animals said.

So when the creatures all came to the Barnyard Reunion Billy Goat or Sir William Goat, the Gentleman, was also called "The Barnyard Poet." Yes, everyone was on hand, or

haps one should say reunion. Porky Pig and Mrs. Duck helped to enter-

tain. The song sparrows came and the owl sent word was sleeping he'd come. (They hadn't asked him so they were just as glad he couldn't come.) The Dog who had become so brave came along, so did Sharpy Squirrel, Running Rabbit,

Sun Came Mrs. Blue Jay, "The all of the

ducks and pigeons and hens and roosters and pigs and geese and turkeys.

fact it was a splendid reunion and there was excellent food, though of course the Pig family forgot about entertaining any but themselves when the food came along!

But there was enough to go around The Geese weren't quite as polite as they should have been, of course, but taking it all in all it was a spleniid barnyard reunion.

ORIGIN OF GOLD NUGGETS

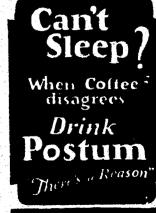

United States Geologist Says Finding of Huge Pebbles Does Not Indicate Large Vein.

In a rugged, out-of-the-way region in Monterey county, California, gold nuggets have been found of such size as to suggest that this was once a favorite retreat of the proverbial goose that laid the golden eggs. Matter-of-fact prospectors, however, have sought to find the velos from which such masses of gold, loosened by the weather, were washed into the stream beds. Their search has not been sucessful, and J. M. Hill, a United States geologist of the Department of the Interior, in a report just published, suggests that the nuggets came from rich uperficial pockets in very small veins, and that no large and rich deposits are likely to be found by deep mining. The Coast ranges of California, unlike the Sierra Nevada, are not rich in gold. and the occurrence of these large nugnot necessarily indicate the existence of a rich deposit of gold ore.

Geographical isolation makes the Railroads of Michigan a transportation system like that of no other state. Most of our traffic either originates or ends in Michigan.

Bridge the Great Lakes with car-ferries and tunnel under the mighty connecting rivers, though we may, such accomplishments merely better our service to you; we are Michigan Railroads more than transcontinental traffic lines. Our train schedules are for Michigan, not for New York and San Francisco.

To a degree greater than any other state, Michigan's welfare, and the welfare of her Railroads, are therefore one and inseparable. You cannot fall back on trans-continental lines for emergency help; we must always rely on you for our chief support.

We can prosper only together.

Because of this mutual dependence, the twentyfour Railroads operating in Michigan have formed this Association with the purpose of strengthening the relations of the Railroads with the People of the State, by providing you with a clearing house for the exchange of ideas, relative to the transportation problems so vital to the prosperity of our Peninsular State.

We invite your suggestions toward bringing about a better understanding and closer cooperation between the Public and the Railroads. Communicate with this Association.

FARM BUREAU NOTES R. D. BAILEY County Agricultural Agent

LIVESTOCK

MEAN PROFITS IN

Crawford County has splendid possibilities. The beautiful exhibit of grains, grasses, fruits, vegetables pictures of county scenes, shown by Supervisors Wm. G. Feldhauser and O. B. Scott and the County Agent at the Bay City and Saginaw fairs prove that we do produce good things, that the possibility and the opportunity of the county of

the possibility and the opportunity are here.

If we showed nice grain from a few farms it merely emphasizes the fact that all farms in the county could grow the same if the owners were as careful to fertilize, fit the soil as well, and use high-class seed.

If we showed nice alfalfa, from a few farms and the very light State farm at Grayling, it proves that this desirable feed is within the reach of any farmer who has enough gumption. farm at Grayling, it proves that this desirable feed is within the reach of any farmer who has enough gumption.

If we showed beautiful apples from the sprayed orchards of two or three, it shows that there could be perfect apples from every farmer?

perfect apples from every farmer's

No gains without pains. No gams without pains.

If we showed nice Rosen Rye that yields 25 bushels per acre where others get 10 or 12 does it not prove that all of us need to secure better seed and put it on soil better present the best way to do that is let the pigs run in clover pasture (or alfalfa). pared by fertilizing and fitting? Why Not Do These Things?

Grayling and the resort and en campment trade will take all the good stuff we can produce; but, we must produce what people want.

What Do They Want?
Last week these notes contained the thought that if people did not want so many early apples and culls of others, instead of letting this valuable product waste, we should work them up into cider to be preserved sweet by heat, vinegar, boiled cider apple butter, jelly, fruit butter.
There is not much of these on the

market. Anyone who has ever tasted good apple butter wants more.
Good cider vinegar sells high.
Can't Get Enough Butter or Eggs.

Grayling merchants ship in large quantities, of butter and eggs be-cause Crawford County farmers don't produce enough of these. Does this, or does it not, point to opportunity? I'll say it does.

Does Poultry Pay.

At the Saginaw fair I asked Mr.

Geddes, a prominent farmer, living about seven miles out of Saginaw, if roultry could be made to pay a farmer. He said "Says this at the farmer has the gumption to do his part." He said "Says this at the farmer has the gumption to do his part. woultry could be made to pay a farmer. He said: "Sure thing. I keep Barred Rocks and White Leghorns. We hatch the Rocks and buy day-old Leghorn chicks. I keep account of

There have been weeks that they have paid us \$85. They have aver-

pains with the ration.

"We buy a strain of White Leg-horns that have been bred and selected for forty years to be big layers. They cost us a little more; but it pays to buy them. Yes, hens can pay a farmer big. Tell your farmers in Crawford County to do as I

(1). They can start a farmer-controlled meat market; or, (2). They can organize a cooperative marketing association, register with The Michigan Live Stock Exchange, and ship to it, at Detroit or East Buffalo.

I notice that cooperative marketpains with the ration.
"We buy a strain of White Leg-

have done with hens, and hens will buy their groceries the year around."
At the Bay City fair I talked with
Mr. Horn. He went onto a small sand, farm, covered with one pine stumps on the Midland Road, out of Bay City. He has prospered. He set out fruit trees and took care of them. While waiting for them to bear he took in lots of money from small things, like vegetables, poul-try, eggs, raspberries and particu-larly strawberries. As his fruit trees took more and more time he reduced the size of the strawberry patch. Last year, from his half acre

of strawberries he took in \$472.

with an ax to make us hear?

Instead of selling rye for the very low price it now brings (some offer 50 cents a bushel), better grind it for horse feed at the rate of one-third

rye to two-thirds oats.
Grind and use in cow feed to displace ground corn in the ration. Mix

enough by the way they waste liquid and solid manures

run in clover pasture (or alfalfa), and feed them corn and skimmilk at the rate of three pounds of milk to one of corn. In pigs quick gains ir weight are cheapest gains. Mad Enough to Improve.

When farmers anywhere have stood enough they have generally

been goaded to action which led to improvement.

With local farmers complaining that they cannot get hold of enough money to meet expenses, we are met with the truth that thousands of dolars worth of butter, eggs, ice cream and vegetables are shipped into Gray ling. This is because our farmers have not gumption enough to produce these things and to offer them in at ractive form.

Farmers have the remedy in their

Those who prefer to ship should remember that the State Farm Buresul has at Detroit a Farm Bureau Produce Exchange to which nearly every form of farm produce, except

We hatch the Rocks and buy day of association with the Declote Rolling Leghorn chicks. I keep account of Bureau Produce Exchange, then ship all expenses. About half the day-old to it. The Exchange does business to it.

all expenses. About hair the day-old chicks we buy are, of course, cocker-els. We crowd them to early maturity and get enough for them to pay for both the pullets and cockerels we buy as day-old chicks, and for feeding the cockerels to sale time!

"We keep 400 hens. Since January first there have been days that they brought us five dollars profit.

There have been weeks that they

To the Honorable Board of Supervisors of the County of Wexford,
Michigan.

visors of the County of Wextord, Michigan.

Gentlemen:

Your petitioner, the Consumers Power Company, a corporation authorized to do business in the State of Michigan, with its principal office in the City of Jackson, Michigan, represents unto your honorable body as follows:

That on October 24, 1913, a permit was granted the Western Michigan Power Company to construct certain dams on the Manistee River in Wexford County, at the locations and of the heights specified in said permit.

That such rights now vest in your petitioner by proper assignments.

That in said permit under the

your petitioner by proper assignments.

That in said permit, under the head of "locations" is listed and described with other dams, the Yuma Dam, and the location is given as the Northwest Quarter (NW¼) of the Southwest Quarter (SW¼) of the Northwest Quarter (SW¼) of the Northwest Quarter (SW¼) of Section Twenty-one (21). Township Twenty-three (23) North, Range Twelve (12) West. That it is found to be more advantageous to construct the Yuma Dam on the West Half (W½) of the Northwest Quarter (NW¼) of Section Thirty (30). Township Twenty-three (23) North, Range Twelve (12) West, which location is in the same township.

which location is in the same township.

That in said permit, under the head of "Height," the Yuma Dam is given as not exceeding thirty (30) feet.

That in case the location of said dam is changed, it is desirable to change the height to not exceeding seventy-five (75) feet, and also to change the name toe "County Line Dam."

Your petitioner therefore prays that said permit be amended as fol-

that said permit be amended as follows:
Under the heading of "Locations," the following language be stricken out:
"YUMA DAM: On the NORTH-WEST QUARTER (NW 1/4) of the SOUTHWEST QUARTER (SW 1/4) and the SOUTHWEST QUARTER (SW 1/4) of the NORTH-WEST QUARTER (NW 1/4) of Section TWENTY-ONE (21), Township TWENTY-THREE (23) North, Range TWELVE (12) West."
and that there be inserted in lieu

West."
and that there be inserted in lieu
thereof, the following:
"COUNTY LINE DAM: On the

MORTGAGE SALE.

Whereas, default has been made in the payment of the money secured by a mortgage dated the twenty third day of February, 1922, executed by William T. Murphy and Florence Murphy, his wife, to the undersigned, Marius Hanson, of Grayling, Michi-Mr. Farmer!

Mr. Farmer!

Mr. Farmer, how badly do you feel your grievances? Enough to take action to correct them, or just enough to wonder why "they" don't do something that you have not the gumption to do for yourself.

Daily Potest

this notice is the sum of one hundred eighty seven and 85-100ths dollars of principal and interest and the further sum of fifteen dollars as an attorney fee provided for by statute which is the whole amount claimed to be unpaid on said mortgage; and no suit or proceeding having been instituted at law to recover the debt now remaining secured by said mortgage, or any part thereof, whereby the power of sale contained in said mortgage

has become absolute,
Now Therefore, notice is hereby
given that by virtue of the said power. expect some crawford County farmers to select some choice potatoes with great care to enter at the Gaylord Show.

Watch next week's AVALANCHE for more about the show.
